② Navigation Menu

Displays navigation menus such as suspending navigation and changing hole

From the navigation settings, you can configure various navigation-related options, such as changing the distance unit. Tap each item to select it. Press the lower button again to return to the navigation screen.

③ Auto View Change/Auto Measure Function

Auto View Change

The navigation screen automatically switches between the Hazard, Simple, and Green Views depending on the remaining distance to the green

① Hazard View

Distance to the front edge and various hazards on the course

② Simple View

Distances to the center, front edge, and back edge of the green

③ Green View

Distance to the center and front edge and undulation, shape, width, and depth of the green

Auto Measure (Automatic Distance Measurement)

The device automatically detects your swing and registers the location

※ If the distance between shots is too close, it is not automatically detected. Please register the location manually.

① Automatically detects your swing and registers the location

Drv is changed from yellow to red

② Automatically displays the distance from ①

③ Automatically displays the distance from ②

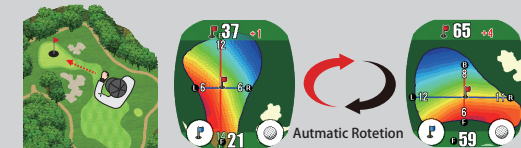

Pin Position Registration

In Green View, tap the pin icon on the screen to register the pin position

④ Dynamic Green Eye Function

Green View displays the undulations of the green in color

High Low

Green View display automatically rotates to match the direction from your current location, showing the width, depth, and distance to the front edge and center of the green

※ Dynamic Green Eye is not available in competition mode or for golf courses outside of Japan

⑤ Three-Point Distance Measurement

While in Simple or Hazard View, tap anywhere on the layout. It displays the distance from your current location to the tapped point (red line) and from that point to the green center (blue line).

⑥ Fairway Navigation Function

Fairway Navigation function displays the distance from your current location to the center of the targeted fairway, as well as the distance from that point to the green

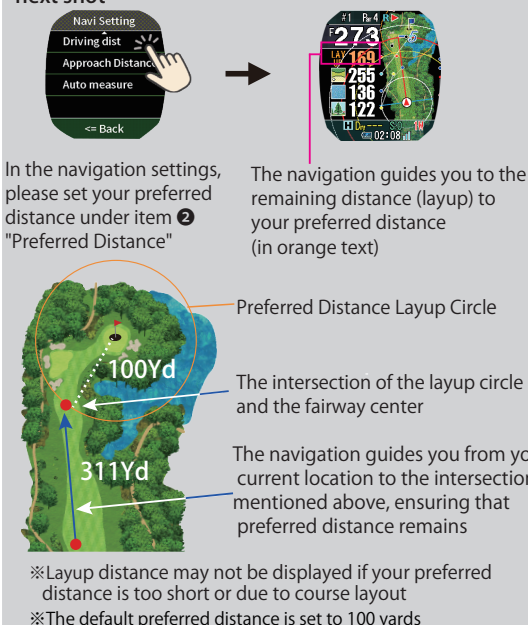

Short press the middle button (Short press the lower button to return to the navigation screen)

A message is displayed when compass calibration is required. Rotate the device several times in a figure-eight motion to complete the calibration

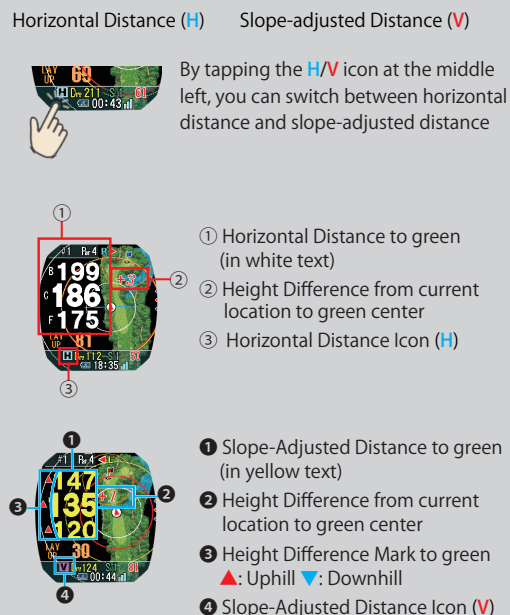

⑦ Layup Navigation

The distance for a layup is provided to help you target the green with your preferred club distance for the next shot

⑧ Height Difference

Switches between horizontal distance and slope-adjusted distance

⑨ Display Options

During a round, you can enable or disable the distance circle display

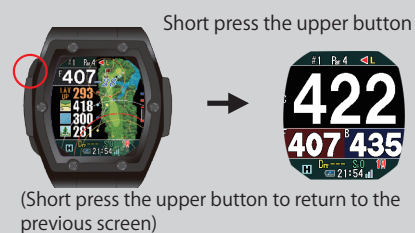

⑩ Scorecard

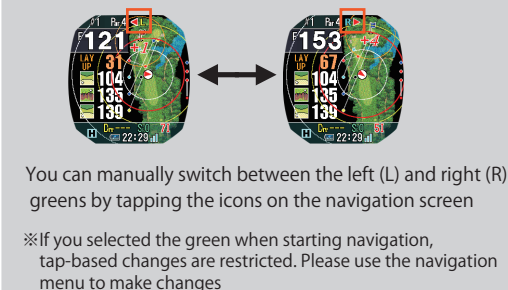

You can enter the score (strokes, putts)

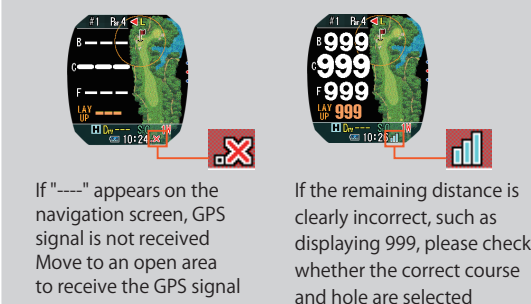

⑪ Display Text in a Larger Size
